AquaRite EVP

Enhanced Vertical Pleat (AR1TP2P-EVP)

FDA Compliant

The Strainrite Companies are proud to announce the development of a substantially enhanced version of our time tested, and widely acclaimed, "Value-Life" Series of patented pleated filter bags! Even more value added!

Our EVP [Enhanced Vertical Pleat] filters are the product of years of successful, application specific filtration in a variety of industries, using the Model 8T as the genesis of the "Value-Life" Series. By working closely with our distributor partners, and their valued customers, we have learned how to amplify the critical features that make the "EVP" the greatest value in the Filtration Marketplace today. With proprietary advances in pleat profile and rigidity, graded density materials of construction, and utilized surface area, no filter element provides equal filtration performance, life, and loading capacity at a similar price. Experience for yourself how Strainrite's proprietary "Depth by Design" Filters will change your view of Filtration from that of an expense, to that of the means to improved process and product, as well as a better bottom line!

Specifications

Features	Benefits
Optimized Pleat Profile Rigidity	• Provides > 50% increases in surface area utilization increase • Protects final filter media from premature blinding • Dramatically increases filter life
True Graded Density Design and Increased Surface Area	• Real labor cost-savings due to fewer filter change-outs • Reduced employee exposure and product loss • Reduced filter element disposal costs • Increased productivity due to longer, uninterrupted processing/run times
Versatility / Convenience	• No equipment modification required • Fits all industry standard #1 and #2 size bag housings
Multiple Sealing Options	• SealRite • Stainless steel rings and plastic flanges • Optional zero bypass vessels • AquaRite, available for extended life applications
